

## Glitex Test

Create a system that enables a user to create account, verify the account from their email address, and forward some attachment to the review committee/person. The review committee can do the following

1. Return the documents to the user to make few collections. The system should allow the review committee/person make the notes with the correction details that are seen by the user. After the user makes the proposed correction, they re-upload the documents send to the reviewing committee/person and receive acknowledgement that their documents were received. – This is after the review committee acknowledge receipt
2. Forward the documents and to the Administrator who acknowledges receipt. After acknowledging, the system should notify the review committee/person that the admin received and acknowledged receipt.
