RE: APPLICATION FOR INTERNSHIP

Dear Hiring Manager,

My name is Jerry Gathu and I am a graduate of JKUAT in B.sc Control and Instrumentation. It is my desire that I may get a chance to intern with this company and grow my experience as an engineer. Having read about the company through online research has inspired me to seek out to become part of the team. I have previously worked on attachment basis at Elgon Kenya Ltd. It was there that I gained hands-on experience in machine testing, inspection, repair, and maintenance. I also did electrical installations and wiring. I got to work with experienced technicians from whom I garnered invaluable skills and knowledge. For my fourth-year project, I designed and implemented a hand gesture-controlled wheelchair. I got to work and program a variety of sensors and through this gained passion and knowledge in the field.

With the experience coupled with my diligence, it is my hope that I will become a valuable asset to the company if given the chance. One of my qualities is that I adapt and learn fast in my surroundings. I make it an obligation to learn what I don't know and I am willing and eager to learn from others. I am always punctual and I do my absolute best to never miss a single day of work. I am passionate about my work and I will always approach every problem with enthusiasm.

I, therefore, hope that you will after reviewing my application deem it fit to give me a chance to grow myself to become a better engineer with your company. Thank you for taking the time to read this letter.

Sincerely,

Jerry Gathu.
